STAND-IN STACKERS

1.2 - 2.0 tonnes

**SMALL SPACES
BIG PERFORMANCE**

If you are looking to maximise the efficiency of your warehouse space, stand-up stackers may be the perfect choice for you. Combining minimal dimensions, a tight turning circle, and excellent operator protection, they offer an affordable and flexible alternative to a full VNA solution. By keeping the driver completely — and safely protected — within the truck, they can manoeuvre in much smaller aisle width.

SBR12-20N2(I) Series

STAND-IN STACKERS

1.2 - 2.0 tonnes

Designing a warehouse around stand-in stackers is up to 35% more efficient from a space point of view compared to pedestrian stackers, typically lowering the cost per pallet position by a third. The compact profile also potentially allows for two-way traffic in aisles vs a reach truck, allowing for increased productivity.

And standing is the most efficient position for an operator from a working point of view, easily allowing them to frequently step on and off throughout a shift. There is ample space to work while still offering excellent all-round protection while working, and by being entirely within the truck they are better protected against collisions.

BRAKES

- **High-efficiency regenerative braking**
This gives more effective control and reduces brake wear.

DRIVE

- **Powerful AC drive motor**
High torque for greater efficiency. No carbon brushes mean lower servicing requirements.
- **Intelligent Cornering System**
The truck senses the angle of a turn and reduces speed early for maximum stability and accurate, positive cornering.
- **Automatic Speed Reduction**
Drive speed is automatically limited when forks are above 1.7m to allow higher capacities above that height.
- **10 km/h standard speed (option 12 km/h)**
Higher productivity is available if needed.

ELECTRICAL AND CONTROL SYSTEMS

- **Built-in Li-ion battery**
Fast opportune charging removes the need for extra batteries and allows 24/7 operation. (Junior chassis only) (Option)
- **Combi controller lift system**
Fingertip control for speed regulated lifting and proportional valve for lowering.
- **Enhanced Stability System (ESS)**
4-point chassis for maximum stability, drive speed is reduced when forks are lifted over 1.7 m.

FORKS AND MAST

- **Tapered and angled fork tips**
Access to pallets is easier, quicker and safer.
- **Level Assistance System**
Automatically detects the operator's intention and automatically stops when the forks are precisely at the right level. (Option)
- **Laser positioning guide**
Aligning the red laser with rack markings allows the driver to quickly ensure the forks are central to the desired position. (Option)

FRAME AND BODY

- **Robust chassis**
Built for intensive operations, with great inherent strength and high residual capacities. Designed to enclose the operator within for extra safety.
- **Strong battery lock**
Simple and safe. Battery lock can only be unlocked when battery plug is disconnected. Battery plug can only be reconnected if battery is locked.
- **Excellent ground clearance**
Easy and safe handling on loading docks and ramps.
- **RapidAccess features**
These allow quick and easy entry to all areas for checks and maintenance.
- **Waterproof wiring and connectors**
Sealed compartment prevents system failure and corrosion from water and dust.
- **Overhead guard pillars**
Protection for the operator while still offering excellent visibility.

AXiA EX

SBR12-20N2(I) Series

STAND-IN STACKERS

1.2 - 2.0 tonnes

HYDRAULICS

- **Smooth, quick lifting and lowering**
High levels of control and productivity. Low noise means less fatigue for the operator over long shifts.
- **Mast damping**
Soft and seamless transition in the mast stages provides low noise and vibrations when lifting or lowering.

OPERATOR COMPARTMENT AND CONTROLS

- **Optical Presence Sensor**
This locks all movement of the truck and its mast if the operator is not present. Driver can lift foot slightly without brakes automatically engaging, reducing muscle stress.
- **Plenty of storage space**
Storage for on-board essentials, putting clipboard, mobile phone, drinks bottle and pen all within easy reach.
- **Ultra-low step height**
Operators stay more productive throughout shifts thanks to easy on/off access.
- **Ergo Forks Trailing Control**
When working with forks trailing, an additional speed control allows an operator to stand in a more comfortable and ergonomic forward-facing position while travelling. (Option)

STEERING SYSTEM

- **Fully adjustable steering wheel**
Height and distance are ergonomically adjustable to reduce strain and lower risk of RSI.
- **360-degree steering**
The operator can keep the truck in constant motion - saving seconds on every turn. (Option)
- **Dynamic Power Steering**
Smooth, precise control with minimum effort offering maximum comfort and stability at top speed.

AXIA EX AVAILABLE LI-ION SYSTEMS

MAKE YOUR FORKLIFT GO EVEN FURTHER

Tried, tested and proven in the field, lead-acid batteries have been the long-standing top choice for companies employing electric lift trucks. However, with long charging times, demanding maintenance requirements, the need for extra batteries and high risk of operator misuse, it can be a challenge. Fortunately, there's a new battery system on the block: Li-ion from Mitsubishi Forklift Trucks.

Designed to meet your business' demands - including multi-shift (24/7) operations - without the need for spare batteries, our high-performance Li-ion battery system is up to 30% more efficient than lead-acid counterparts. Plus, it's virtually error-proof, thanks to its ultra-low-maintenance design.

- **Gas-emission free and space efficient operation**
with no need for air ventilation and/or closed charging room.
- **Exceptional high battery & charger efficiency**
due to state-of-the-art technology, delivers up to 30% more power efficiency than lead-acid batteries.

- **Maintenance free design**
eliminates the need for daily checks and water re-fills by operator, and reduces the risk of operators damaging cells.
- **No spare batteries and charging room required**
saves space and costs in multi-shift application to maximise profitability.
- **Quick charge capabilities**
mean that just 15 minutes is all your battery needs to keep your truck going a few more hours. (It only takes from 1 hour to fully charge a completely discharged battery.)
- **Higher sustained voltage**
ensures more consistent lifting and driving performance, which is particularly noticeable towards the end of a shift.
- **Active protection componentry**
continuously monitors the system, highlighting potential issues, including misuse.
- **High safety features include**
circuit protection, deep-discharge and overcharge protection, individual cell temperature and voltage monitoring.
- **On-the-go performance and monitoring**
is possible thanks to the system's integrated monitoring system with easy-to-read display unit.
- **Wide choice of battery and charger capacities**
so the most suitable power supply can be matched to the exact requirements of a specific application.

THE MOST COST-EFFECTIVE SOLUTION

When you factor in the extensive lifetime, no need for maintenance, higher power efficiency, and up to 30% savings, a Li-ion battery is most often the choice that saves money and offers peace of mind.

WHEN RELIABILITY IS EVERYTHING...

AXIA
THE ALL ROUNDER

With a name that reflects its manoeuvrability, AXIA combines award-winning ergonomics with high performance and low maintenance features to deliver a complete warehouse support package.

Efficient, versatile and durable, AXIA is the perfect choice for every workplace.

Like any product bearing the "MITSUBISHI" name our materials handling equipment benefits from the tremendous heritage, huge resources and cutting-edge technology of one of the world's largest corporations – Mitsubishi Heavy Industries Group.

Engineering spacecraft, jet planes, power plants and more, MHI specialises in those technologies where performance, dependability and superiority decide your success or failure...

So when we promise you quality, reliability and value for money, you know it's a guarantee we have the power to deliver.

That's why every model in our award-winning and comprehensive range of lift trucks and warehouse equipment is built to a high specification – to ensure it keeps working for you. Day after day. Year after year. Whatever the job. Whatever the conditions.

YOU'LL NEVER WORK ALONE

As your local authorised dealer, we are here to keep your trucks working – through our extensive experience, our technical excellence and our commitment to customer care.

We are your local experts, backed by efficient channels to the entire organisation of Mitsubishi Forklift Trucks.

No matter where you are, we are close by – with the capability to meet your needs.

Discover how Mitsubishi Forklift Trucks give you more from your local authorised dealer or when you visit our website www.mitforklift.com

Performance specifications may vary depending on standard manufacturing tolerances, vehicle condition, types of tyres, floor or surface conditions, applications or operating environment. Trucks may be shown with non-standard options. Specific performance requirements and locally available configurations should be discussed with your distributor of Mitsubishi forklift trucks. We follow a policy of continual product improvement. For this reason, some materials, options and specifications could change without notice.
